

Indelco: Fabrication & Machining

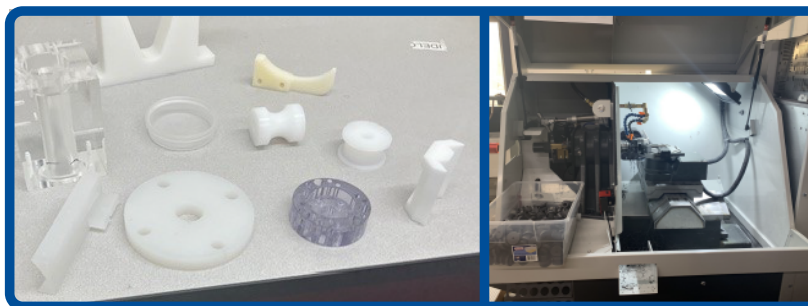

From tanks to ventilation systems, Indelco provides expertly crafted fabricated components that support chemical handling, water treatment, plating, and manufacturing operations. We specialize in plastic fabrication—and pair it with precision machining when your application demands it.

FABRICATION SERVICES

- **Plastic Tank Fabrication:** Polypro, HDPE, PVC, PVDF—custom-welded for durability and chemical resistance. Steel supports provided when needed
- **Steel Tanks with Koroseal Lining:** Heavy-duty tanks with corrosion-resistant interiors.
- **Tank Liners:** Drop-in options for retrofits or replacements.
- **Containment Systems:** Trays, Koroseal linings, epoxy floor coatings, and valve containment boxes.
- **Ventilation Equipment:** Large-diameter ducting, hoods, and specialty fittings.
- **Custom Components:** Frames, catwalks, and chemical wet benches.
- Molded tank modifications including installation of flanges, couplings, supports, etc.

MACHINING CAPABILITIES

- CNC routing, milling, and turning
- Precision parts made to your specifications
- Tight, repeatable tolerances across all runs

Industries Served

- Marine & Water Treatment
- Medical & Semiconductor
- Packaging Equipment & Metal Finishing

Our integrated fabrication and machining services allow us to build components that perform reliably, even in the harshest environments.
