

# Indelco: Plating Lines

Indelco designs and installs complete plating systems tailored to your facility's needs. With deep expertise in chemical processing and metal finishing, our team builds solutions for industrial plating—backed by installation, repair, and long-term support.

## COMPREHENSIVE PLATING SOLUTIONS

We supply and install everything you need for a high-performance, compliant plating system:

- **Hoists:** Choose manual or automatic operation to match your process requirements.
- **Tanks:** Fabricated plastic, steel with Koroseal lining, or drop-in liners to suit your chemical compatibility.
- **Ventilation Systems:** Hoods, ductwork, blowers, scrubbers, and push-air setups for safe, compliant operation.
- **Containment & Flooring:** Epoxy floor systems, Koroseal linings, trays, and valve containment boxes.
- **Control & Movement:** Load/unload stations, pre-wired control panels, catwalks, and hoist integration.
- **Wastewater Treatment:** Tanks, lift stations, and pH adjustment systems for environmental compliance.

## SYSTEM TYPES

Rack, Barrel, Basket, or Combination Lines

- **Custom-configured to meet your throughput, bath chemistries, and part geometries.**

## Why Choose Indelco?

We bring decades of experience in designing, fabricating, and maintaining plating systems. Trusted by industry leaders, we're known for delivering systems that stand up to industrial demands.
