

## CUSTOM TANK FOR A CUSTOM FIT

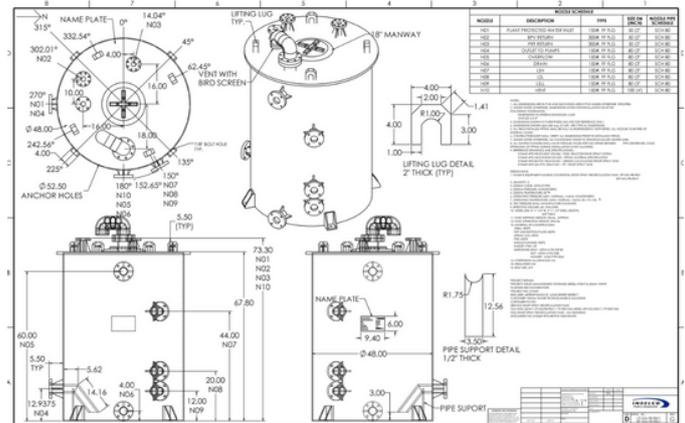

### OVERVIEW

A prominent customer in the Minneapolis area reached out for a quotation on a tank for a custom need. Competing against an FRP offering, we provided an alternate 500G Snyder tank with added welded lid, flanges, and lifting lugs. Multiple meetings and Solidworks drawings to Rev G finally locked in a two tank build north of \$10K on two 500G tanks.

### SOLUTION

By combining the talent of our fabrication department and the Solidworks capabilities of Technical Sales, we were able to provide a high-quality product at a high margin that left both parties satisfied. The customer was happy with the results, and we were happy with the profit margin.

If you're in need for a custom fabricated tank for a custom solution, please send your inquiry into [Fabquote@indelco.com](mailto:Fabquote@indelco.com).

### CAD SOLIDWORKS

If you need assistance with CAD Solidworks drawings whether you're looking for upfront clarification on a step file or looking to get assistance or creating a professional drawing for your fabricated tank, product, or skid... please feel free to jointly reach out to [techsales@indelco.com](mailto:techsales@indelco.com).
